DRC STAFF/OTHERS PRESENT

Fred Nelson, Utah Attorney General's Office

PUBLIC

None

GREETINGS/MEETING CALLED TO ORDER

The Utah Radiation Control Board convened by teleconference on April 23, 2002. Public meeting space to observe the proceedings and listen to the conference call were made available in the DEQ Building #2, Room 205, 168 North 1950 West, in Salt Lake City, Utah. Since neither Chairman Nelson or Vice Chairman Edwards were present, the Board by unanimous consent directed that Teryl Hunsaker chair the meeting. The meeting was called to order at 4:05 p.m., by Teryl Hunsaker, Acting Chairman of the Board.

II. RULES (Board action item)

- a. Changes to R313-15-1001 , R313-19-2, and R313-22-39 relating to uranium mills and uranium mill tailings disposal facility requirements - to public comment

Bill Sinclair reported that as the rules were being developed for uranium recovery, it was discovered that three additional rules needed minor changes that were not presented before the Board at the April 5, 2002 meeting to be filed and go to public comment. Yolanda Shropshire provided you copies of the three proposed rule changes by electronic mail. For rules R313-15-

1001 and R313-22-39, a reference to the new uranium recovery rule (R313-24) is added to these sections of the rules because it would be applicable. The other change to R313-19-2 clarifies that uranium recovery licenses are subject to requirements of general applicability by being subject to the new uranium recovery rule, R313-24.

Recommendation: The Board approve the filing of changes to R313-15-1001 , R313-19-2, and R313-22-39 with the Division of Administrative Rules to go to public comment.

Karen Langley made the motion to approve the changes to go to public comment, seconded by Rod Julander.

CARRIED AND PASSED UNANIMOUSLY

There were no further board items for discussion or action during the teleconference. The meeting by teleconference was adjourned at 4:12 p.m.
